PROFESSIONAL SUMMARY

Product Manager with 7+ years leading products from 0→1 across AI, e-commerce, fintech, and healthtech. Built the entire product function from scratch as the first product hire at a healthtech startup, defining strategy, roadmap, and go-to-market for a team of 8. At Amazon, led the product strategy for Alexa Voice across 18 Indian languages, driving a 40% improvement in voice experience quality and contributing to a 1.5M user expansion. At Travel Chapter, identified and led a marketplace opportunity that generated £5M in incremental revenue and built a repeatable framework for channel growth. Certified SAFe POPM, PSPO, and CSM.

SKILLS & COMPETENCIES

Product: Product Vision & Roadmaps, PRDs, Go-To-Market Strategy, Product-Market Fit, Competitive Analysis, Market Research, OKRs, Success Metrics & KPIs, RICE/MoSCoW Prioritisation, Product Lifecycle (0→1), Business Case Development

Stakeholder & Leadership: Cross-Functional Team Leadership, Stakeholder Management, C-Suite Communication, Conflict Resolution, Vendor & Partner Management, Product Discovery, Customer Interviews, API Integration Management

Design & Research: Design Thinking, User Research, Wireframing & Prototyping (Figma), User Journey Mapping, Usability Testing, A/B Testing

Agile: Scrum, SAFe, Kanban, Continuous Delivery

Tools: JIRA, Confluence, Figma, Miro, Salesforce, Power BI, SQL

EXPERIENCE

Product Owner

Encon Pharma | Remote, UK | February 2026 - April 2026

- First product hire at an early-stage healthtech startup, responsible for defining product strategy, roadmap, and go-to-market approach for AI-powered compliance software targeting UK community pharmacies. Set up the product function from scratch, giving a team of 8 (7 developers, 1 designer) the structure and direction needed to build and ship with confidence.
- Designed and delivered the pharmacy onboarding product, enabling pharmacies to self-register, select their NMS product, complete payment, and go live within 6 weeks and with zero manual intervention, removing a critical barrier to customer acquisition.
- Defined the full product scope for the NMS conduct consultation module, mapping the end-to-end patient journey, setting clear requirements across eligibility, follow-up scheduling, adherence checks, and clinical outcomes, enabling the team to move into delivery without ambiguity.
- Shaped product strategy for 2 compliance modules, CD Register management and Responsible Pharmacist Logs, ensuring full alignment with GPhC standards and NHS England regulatory obligations, reducing compliance risk for pharmacy clients.
- Authored PRDs for bi-directional data integration with RWA and Pilltime, covering NHS number sharing, NDA requirements, and payment reconciliation workflows, giving engineering a clear, unambiguous brief for a technically complex, multi-party integration.
- Conducted competitive landscape analysis across TITAN PMR, HubRx, Medify, and PharmOutcomes, presenting findings to leadership to inform product positioning and go-to-market strategy.

Technical Product Owner

Travel Chapter | Norwich, UK | June 2024 - February 2026

Initially embedded in frontline customer operations (June 2024 - Feb 2025) to build deep domain expertise in booking flows, guest pain points, and contact centre metrics before transitioning to product management.

- Identified HomeToGo as a high-value marketplace opportunity, built the business case, and led the end-to-end integration from requirements through to launch, generating £5M in incremental revenue. Translated lessons learned into a scalable partner onboarding framework that reduced future integration timelines by 40%, creating a repeatable model for channel expansion across the platform.
- Uncovered a 20% delivery gap caused by unclear priorities, poorly refined requirements, and misalignment across product, engineering, and QA. Fixed it by restructuring how the team planned and prioritised, introducing an 80/20 split between roadmap work and unplanned requests, improving delivery velocity by 20% and giving leadership reliable, predictable output for the first time.
- Owned product strategy for OTA channel expansion across 15,000+ vacation rental properties, managing integrations with HomeToGo, VRBO, and Google Travel to diversify distribution and reduce single-channel revenue dependency.

- Led customer discovery and data-driven research to define the roadmap for booking platform improvements, identifying the highest-value problems across booking flow, affiliate pipeline, and payment integrations, and translating them into a clear, prioritised set of initiatives for the team.

Product Owner (UX)

SPR Consultech - FORA Financials | Chennai, India | April 2022 - March 2023

- Led product strategy and UX direction for FORA Financials, translating complex financial workflows into intuitive interfaces through design workshops, Figma prototyping, and iterative usability testing with 13+ users, improving user satisfaction scores by 12%.
- Built real-time performance dashboards in Power BI tracking SLA compliance, feature adoption rates, and customer health metrics, enabling data-driven product decisions for client-facing delivery teams.
- Led product discovery sessions with stakeholders to surface workflow pain points, then shaped the roadmap around the highest-impact improvements, reducing client onboarding friction and contributing to a 13% increase in platform adoption within two quarters.
- Facilitated regular sprint reviews and product demos with stakeholders, gathering feedback directly from end users and business heads to refine product direction, ensuring the team was always working on what mattered most to the customer rather than relying on internal assumptions.

Associate Product Manager - Alexa Voice AI

Amazon Development Centre | Chennai, India | May 2020 - November 2021

- Owned the product roadmap for Alexa's voice assistant across Echo, Fire TV, and Amazon Music, setting priorities, defining the product direction, and ensuring the team was always working on the improvements that mattered most to users.
- Led the initiative to fix slow voice response, identified as the top user pain point through customer feedback, usage data, and A/B testing. Defined the problem, set the success criteria, and partnered with engineering to deliver a 40% improvement in overall voice experience quality.
- Co-owned the product strategy for Amazon's "Voice for All" initiative, defining user needs, shaping the go-to-market approach across 18 regional languages, and contributing to a 1.5M user expansion by ensuring the product genuinely worked for diverse accents, dialects, and cultural contexts.
- Took a data-driven approach to product decision-making, gathering user feedback, behaviour data, and interaction patterns to identify the highest-impact opportunities, driving a 55% accuracy improvement and a 25% increase in regional user engagement.

Machine Learning Data Associate - Alexa Voice AI

Amazon Development Centre | Chennai, India | August 2017 - May 2020

- Analysed voice interaction data across Alexa platforms to identify failure patterns, conducting root cause analysis that helped the team systematically reduce system failure rates and improve overall Goal Success Ratio.
- Identified and escalated a critical display bug during Echo Show beta testing that would have surfaced incorrect information to a high-profile public figure, preventing significant reputational risk ahead of launch.
- Designed and delivered a training programme for 23 new team members, cutting onboarding time from 3 months to 1 month, enabling the team to scale faster without sacrificing quality or consistency.

EDUCATION

Master of Science: Business Analytics & Management

University of East Anglia | Norwich, UK | September 2023 - September 2024

Bachelor of Science: Information Technology

Vels University | Chennai, India | July 2014 - May 2017
